Organizer
Akademie Ottenstein
in cooperation with
General Movement Trust

A diagnostic method for the functional assessment of the integrity of the nervous system

This three and a half day advanced course is only for those participants who are already involved in the application of the PrechtI method for analyzing general movements (GMs), who have successfully completed the basic course and passed his final test.

The advanced course offers intensive exercises, demonstrations and lectures for the most precise assessment / possibility of predicting later severe neurological damage.

The training deals with the details of the GM analysis, as well as its application for individual development trajectories.

Participants in the advanced course are invited to bring their own recordings and case studies for presentation and discussion.
